

ENVIRONMENTAL POLICY

Rosslee Construction Limited recognises that as a construction business it has a unique opportunity to enhance and a duty of care to protect and safeguard the environment. In order to achieve this, the Company will seek to:

Reduce, where practicable, the environmental effect of our activities to minimise the potential for pollution, minimise waste production and ensure the efficient use of resources; comply with all current environmental legislation compliance obligations and other requirements, and seek to meet future legislative provisions;

- The Company looks to promote energy efficiency;
- Integrate environmental issues into all aspects of decision making processes within the company;
- Address environmental issues within normal operating procedures;
- Develop and implement emergency response procedures to minimise the environmental impact of incidents;
- Promote environmental awareness and responsibility among employees and those that work on our behalf;
- Ensure continuous improvement in environmental performance monitoring our achievements and continually seeking to improve on these by setting and reviewing environmental targets at our management review meeting.

The Directors are determined that environmental issues are met. To achieve this, our working practices will be measured and reviewed along with other stated objectives and this Environmental policy will be reviewed annually during our Quality Management System Review Meetings.

The environmental policy is made available to interested parties upon request.
